Frameworks 1.20 Has Been Released
Other.
Posted by : Bandit-X
Posted on : Aug-27-2007

Frameworks provides a collective of common functions, classes, service packages like fpdf, tranfser that are required or can be used by modules like article, cbb, planet, wordpress, mediawiki and more...

Major updates in the release:
1 code updates according to XOOPS 2.0.17
2 cache for PDF maker

Download and details: Frameworks for article, cbb, planet and more
user guide:

1 check the files xoops_version.php under /Frameworks/ and subfolder to make sure it is newer than your current ones

2 upload /Frameworks/ to your XOOPS root path:
XOOPS/Frameworks/art
XOOPS/Frameworks/captcha
XOOPS/Frameworks/fpdf
XOOPS/Frameworks/PEAR
XOOPS/Frameworks/textsanitizer
XOOPS/Frameworks/transfer
XOOPS/Frameworks/compat
XOOPS/Frameworks/xoops22 (for compat)

3 check file names: for filename case sensitive system, make sure you have the file names literally correct, i.e., "Frameworks" is not identical to "frameworks"

4 configure preferences where applicable
4.1 ./fpdf/language/: make your local langauge file based on english.php, you could check schinese.php as example, or inline comments in english.php
4.2 ./textsanitizer/config.php: check inline comments
4.3 ./transfer/:
4.3.1 ./transfer/language/: make your local langauge file based on english.php
4.3.2 ./transfer/modules/: for developers only, add transfer handler for your module, or store the file as: XOOPS/modules/mymodule/include/plugin.transfer.php
4.3.3 ./transfer/plugin/: add items available for the transfer
4.3.4 ./transfer/plugin/myplugin/config: configurations for a plugin
4.3.5 ./transfer/plugin/myplugin/language/: make your local langauge file based on english.php
4.3.6 ./transfer/bar.transfer.php: set "$limit" for number of plugins that will be displayed on a front page;

4.4 ./compat/language/: make your local langauge files based on /english/
4.5 ./captcha/:
4.5.1 ./captcha/language/: make your local langauge file based on english.php
4.5.2 ./captcha/config.php: set configs

5 Requirements for XOOPS 2.2* users:
Copy
/Frameworks/compat/language/english/local.php
/Frameworks/compat/language/english/local.class.php
To
XOOPS/language/english/
And for other languages, after creating local language files as in step 4.4,, for instance "french"
Copy
/Frameworks/compat/language/french/local.php
To
XOOPS/language/french/
