I Saw This Posted At XooPS.Org And So I Adapted It To Use With Frameworks 1.20

Xoops.org| Hacks : Hidden Content Hack
in the config.php file in the textsanitizer folder in Frameworks 1.20 . Insert This Line

define('EXTCODE_ENABLE_HIDE',1);//hidehack

and then edit module.textsanitizer.php to enable the hide plugin in the function xoopsCodeDecode_extended. (in my example i have enabled the hide plugin and also a module that loads bbcode plugin files.)

if (EXTCODE_ENABLE_RTSP) { $this->loadExtension("rtsp"); } if (EXTCODE_ENABLE_WIKI) { $this->loadExtension("wiki"); } //Enable Hide Plugin if (EXTCODE_ENABLE_HIDE) { $this->loadExtension("hide"); } //Done Loading //if bbcoder is enabled then.. we run the plugin that includes the extra plugins if(ENABLE_EXTCODE_MODULE){ include_once XOOPS_ROOT_PATH."/modules/bbcoder/include/functions_lite.php"; bbcoder_loadplugin('TEXTSANITIZER', $this); }

and then place the file hide.php in the plugins folder. contents of the file are.
