Thanks To All The People On XooPS. And The Input And Suggestions. Since Dev.Xoops have been up and down lately I've put the download on sourceforge. Not Many Changes, Been Busy With A New Version That Will be able to use other modules and other things.

New Version: XM-Spotlight xmspotlight_09212k7.zip

Current Features:
* Displays A Block That Has The List Of x News Articles In A Category Or The Category and Its SubCategories.
* Able To Select Up To 12 Categories. In The Block.
* Also The Ability To 'Spotlight' Articles. (To Display An Article And Its 'The Scoop' On The Block)
* Category Setting To Show or Not Show Category Image
* To Show Custom Spotlight Image or The Topic Image or No Image.

Install: upload and click install in module admin.
Update: .. save any custom template that you are using. and uninstall the old (maybe delete the folder). and then do an Install.

Changes:
* Template File Extensions Are Changed To .tpl
* Added CSS File
* Some Bug Fixes. Fixed Some Issues With News 1.5x
* Added More Language Constants
* Added An AutoSpotlight Feature That Automatically Spotlights The x Latest Articles (SMD)
* BlocksAdmin Was Taken Out.. For Now.
